

# MAKE SAFETY SIMPLE

## With EHS Hero's Integrated Job Hazard Analysis Solution

Performing job hazard analyses (JHAs) can be time-consuming and frustrating, but they are integral for ensuring workplace safety. EHS Hero's uniquely integrated solution simplifies the JHA process by automating manual processes, keeping files organized and accessible, and providing intuitive mobile functionality. The tool's premade templates allow for step-by-step analysis of tasks and job expectations to help keep your employees informed of hazards and proper work procedures.

### With our JHA tool, you get:

- A searchable, self-building database
- An easy-to-digest user interface
- Trackable revision history
- Built-in employee certification and signoff
- The ability to upload or build unlimited JHAs
- Single-click integration with lockout/tagout, permits, action, safety data sheet (SDS), training, and incident investigation tools
- Detailed analytics to help you continually improve your EHS program

**Streamline your JHA process, avoid costly OSHA penalties, and keep your employees safe with EHS Hero's JHA tool.**
